
Umarex Legends Cowboy Rifle .177 Air Rifles

£ 290

Description

The Wild West comes alive with the Legends Cowboy Lever Action CO2 Air Rifle from Umarex! The Umarex Legends Series brings to life the classic arms of a bygone era backed by the quality standards and imagination only Umarex can deliver. Taking its style from the Winchester Model 1894, load up and roll out this backyard-friendly version of a rifle regarded by firearm historians as the "ultimate lever-action design". With shell spitting action, the Cowboy Lever-Action features a realistic loading ability with 10 BB cartridges inserted into its under barrel tube magazine. Insert two 12-gram CO2 cartridges behind the stock's removable buttplate, cock the lever, and you are racked and ready to send 10 shots downrange at 535 fps! Quickly cock the lever to shoot each round and eject the shell, just like the real steel. If mowing down targets western style is your idea of a great time, grab your iron and hit the range with the Legends Cowboy Lever-Action Air Rifle.
