**BSA R10 TH .177 Air Rifles**

£ 1,045

---

---

**Description**

This thumb-hole version of the famous PCP rifle comes with a variety of upgrades to make it one of the finest rifles that BSA have ever produced. The stock of the gun is fitted with an adjustable soft-touch cheek-piece and multi-adjustable butt-pad for extreme comfort when shouldering. The gun is fitted with a new CCS with enhanced silencing capabilities, with BSA claiming it to be twice as quiet as the previous bull barrel used on the R10. The gun is also equipped with a larger 280cc buddy bottle, which ups the shot count from 190 to 280 in .177.
