

**PAO PAO Multi-Reticle Red/Green Reflex Pistol &
 Rifle Sight. Air Rifles**

£ 27

Description

PAO Multi-Reticle Red/Green Reflex Pistol & Rifle Sight. The increased interest in vermin control in confined spaces has led to growing demand for sights that offer the quick target acquisition of moving quarry, so PAO introduce the Multi-Reticle Red/Green Reflex Pistol & Rifle Sight. The biggest single advantage of a reflex sight is the lack of an eye relief. This means that your head can be positioned anywhere, at any angle, you can keep both eyes open while using the weapon, and it is extremely easy to reacquire targets. Suitable for either pistols or rifles, the exposed Reflex sight has no body tube, so is super-lightweight and ultra compact, being only 8.2cm long and weighing in at a miserly 115 grams. The shooter can choose from four different reticles - Circle dot, cross, 10 MOA, and 3 MOA, in their choice of red or green with 5-levels of illumination. The sight comes with an integrated Weaver/Picatinny 20/22mm mount. Specifications Body: Aircraft Grade Aluminium in a choice of Black or Tan. Fogproof, Waterproof and Shockproof. Objective Aperture: 33mm Field of View: 15.8m @ 100m Weight: 675grams (Including mounts and Sidewheel) Length: 8.2cm Mounts: Integrated Weaver/Picatinny 20mm Reticle: Circle dot, cross, 10 MOA, and 3 MOA Lens Cover Supplied: Flexible Opaque Black Rubber Battery: (Included): CR2032 3v lithium button cell.
