
**Beretta Field White Onyx.. 20G 20 Bore/gauge
Over and under**

£ 1,150

Description

Beretta has a range of much more budget-friendly guns such as the 680 range. This range features models such as the Onyx, White Onyx and the Silver Pigeon 1 which are a favourite of sports shooters and wildfowlers alike! The White Onyx is a striking over-under shotgun built around an action that has become an unrivalled benchmark for over-unders. It features a dual locking-lug system that ensures both strength and sleekness: the dual lugs in the middle of the action dispense with the need of a cross-bolt on top, thus enabling the receiver to be thin and low-profile. The point of balance is right at the hinge-pin, meaning that this Beretta shotgun will shoulder and point better than other brands costing several times as much.
